

### For piglet nests

The robust PORCA nest mat can be easily retrofitted in every piglet nest and also be laid on existing grids. Good storage and distribution of radiated heat. This reduces energy losses. Drafts from below are avoided and a continuous floor surface in the piglet lying area is created (EU directive).

- Easy to retrofit, even on existing grids
- Simple enlargement of the piglet nest for large litters
- Robust and durable
- Easy to clean and disinfect

### Technical data

Dimensions	Thickness	Shape	Width x length
<b>PORCA nest</b>	18 mm / $\frac{3}{4}$ "	Triangular / quadrangular / pentagonal	variable, max. leg length: 125 cm / 49 $\frac{1}{4}$ "

### Maintenance tip

Treatment with a high-pressure cleaner and standard cleaning agents possible.

#### Tolerances

Thickness: +3/-2 mm

Width + length: +/- 1.5% (DIN ISO 3302-1 tolerance class M4)
